

DFG video portal on the excellence initiative - the REBIRTH clip is online

The REBIRTH research video entitled 'Regeneration von Organen anregen' ('Stimulating organ regeneration') is available for viewing on the excellence initiative's video portal.

As of mid-January 2009, German Research Foundation (DFG)-supported institutions are being presented on a multimedia portal, viewable at <http://www.excellence-initiative.com/hannover-regenerative-biology-reconstructive-therapy>, each with a short clip, up-to-date documentation, background information and links to those institutions as well as to the competition itself. One more institution will be added each week, so that eventually all 85 DFG-supported graduate colleges, excellence clusters, and initiatives for the future ('Zukunftskonzepte') will be represented.

Definitely worth a look!
